PARTICIPANTS WANTED FOR RESEARCH STUDY:

Effects of a new weight loss supplement on body composition and metabolism

To Participate:

Must be male between 18-35 years old living in the Denver area.
Must be currently active less than 2x per week and looking to lose weight
Must have BMI between 27-35 (don't know your BMI? We can calculate it!)

Details:

*Take our newest weight-loss product for 8 weeks before it's released! Free!
*Measure your body composition (fat/lean mass), resting metabolic rate (how many calories you burn), and participate in 8 weeks of personalized workouts at our state-of-the-art athletic training facility
*Compensation: 2 free MP Products upon completion of study

Brief Requirements

Week 0 – Baseline measurements of body composition and resting metabolic rate
Weeks 1-8 – TRAIN using techniques and programming designed to maximize fat loss 5x/week
Week 9 – Re-measure body composition and RMR; get free products!
